## MRT systems - Price increase as of March 2022

The international price increases do not stop at the production of magnetic resonance systems. For the remaining systems from the 2021 production we can still keep the "old" prices - a good opportunity to still offer the MRT-systems at last year's prices and conditions. The next batch is currently in production and will be available from March 2022. The "new" prices already apply for this. **You will find the NEW PRICE LIST for the MRT set offers** in the attachment.

## **My thoughts on VALENTINE'S DAY**

There are many different theories about the origin of Valentine's Day - but they all agree on one thing: this day is about love and appreciation. I used to resist this American trend and thought that we didn't need a day for it. Now I find days like Valentine's Day a beautiful occasion to once again consciously reflect on the value of our loved ones and to say thank you. "Thank you for existing just as you are!" And, if it is Valentine's Day that helps to express our appreciation to a loved one, then it is most welcome to me. However, if our hearts are heavy at the time, Valentine's Day may also bring up other feelings in us.
